

SRU TAIL GAS ANALYZER

SRU Tail Gas Analyzer

- monitors H₂S, SO₂, COS, CS₂
- All SRU configurations including Coke Oven Plants
- All TGTU Processes
- Low installation cost
- Engineered for low-maintenance high reliability, no moving parts
- Enhanced CCD UV spectrometer delivers fast, accurate results
- Chemometrics to measure all four key components
- Direct coupling & proprietary probe design provide ability to control sulfur vapor removal efficiently, eliminating plugging problems

Sample System

Sample probe c/w inline-condensor

condensation in process line
= most robust sample system

Sulfur you don't extract, cannot plug
